

## POWERFUL DRAINAGE EFFECT

The main active ingredient in the formula is **Artichoke extract**, a powerful multi-functional agent that is able to **reduce the fluid retention** in our bodies, promoting elimination and therefore reducing the volume of the oedemas that are responsible for cellulite.

The benefits of artichoke extract range from the ability to **reduce the size of the pores**, preventing the appearance of blackheads or other types of impurities that give the skin a damaged and uncared for appearance.

**Cynarin** gives excellent results in body treatments, primarily with regard to those focussed on fluid drainage and volume reduction. This product can also be perfectly combined with other products directed at forming **part of anti-cellulite, volume reducers and localised fat treatments**.

## TREATMENTS

Eye contour, dilated pores, localised fat, cellulite, double chin.

## ACTIVE INGREDIENTS

Artichoke extract

## COMPOSITION

Aqua, Cynara Scolymus Leaf Extract, Sodium Chloride, Sodium Hyaluronate, Glycerine, Potassium Sorbate
