

# ELEMENTS \* L CARNITINA

IT Pharma  
INNOVATING TECHNOLOGY PHARMA

## HYDRATES, FILLS AND FIRMS

Formula based on **L Carnitine**, a powerful agent involved in the lipolysis processes, transporting fatty acids so that they can be used as an energy source and **reducing the fat accumulated** in the tissues.

Without L Carnitine, fat deposits cannot oxidise and, therefore, they are stored in the bloodstream and in the body's cells.

Moreover, the use of L Carnitine is not limited to volume reducing treatments but can also be used for the **treatment of scars and stretch marks**, due to its collagen regeneration ability.

## TREATMENTS

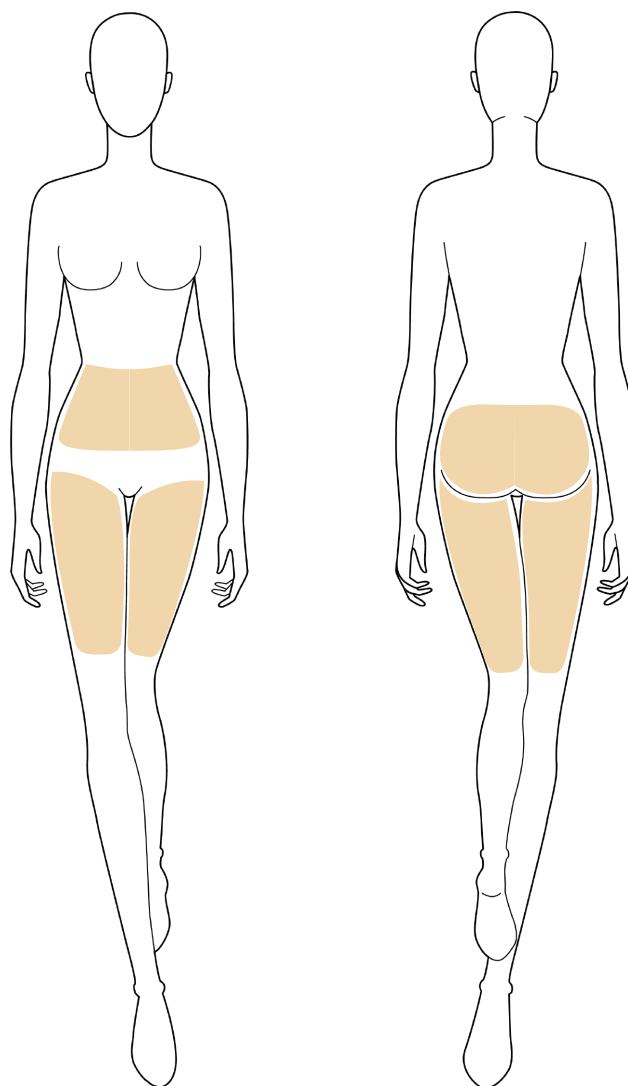

Scars, stretch marks, cellulite, localised fat

## ACTIVE INGREDIENTS

L-Carnitine

## COMPOSITION

Aqua / L-Carnitine
