

## DRAINING AND TONING

The Liposintrol formula **covers all the factors intervening in cellulite**. The combination of Horse Chestnut with extract of Fumaria and Pilosella create a rewarding result for reducing treatments.

The extract of Fumaria and Pilosella makes it possible to **drain and reduce the fat and oedema accumulation**, while Horse Chestnut serves to **improve the micro-circulation** in order to activate and oxygenate the treatment area in which there is fluid retention.

Liposintrol also offers good results in the treatment of **acne** due to the ability of its active ingredients to activate microcirculation and reduce the production of sebum.

## TREATMENTS

Acne, cellulite, double chin, localised fat, circulation problems.

## ACTIVE INGREDIENTS

Horse chestnut, Extract of Fumaria, Pilosella.

## COMPOSITION

Aqua, Sodium Chloride, Fumaria Officinalis Extract, Aesculus Hipocastannum Extract, Hieracium Pilosella Extract.
